DPP SPACE

Digital Product Passports made manageable.

Product identity, materials, suppliers and evidence in one workspace.

WHY ATLAS DPP

Product information lives in too many places

DPP-Space brings it together, so teams see what is known, missing and ready to review.

Specifications

- Kept in separate files and systems

Material and supplier records

- Managed on their own

Supporting documents

- Hard to link back to the product

PLATFORM

From product record to public passport

01 Product record
- Name, identifiers, category, core details

02 Materials and documents
- Materials, suppliers and evidence

03 Readiness review
- Validation, data gaps, lifecycle

04 Publish and share
- Public page and QR code

PLATFORM

Identity: a structured home for product identity

Core master data

- Product number and name
- Brand, model and category
- Description and weight

Identifiers

- Product identifiers
- Batch and serial number
- Country of manufacture

Why it matters

- One place for core details
- Example: VX-200 battery module

Digital Product Passport

PLATFORM

Composition: materials, components and suppliers

Bill of materials

- Product BOM
- Component records
- Material references

Material library

- Shared and reusable
- Weight, origin and recycled content

Supplier records

- Linked to materials
- Sample: 3 components, 8 materials, 4 suppliers

PLATFORM

Evidence: environmental data and documents

Carbon footprint

- Product carbon footprint records
- Linked to the product

Supplier data

- Supplier and manufacturing information

Documents

- Compliance evidence
- Material declarations as PDF

Digital Product Passport

PLATFORM

Readiness: review the work as it develops

Supports internal preparation. It does not determine legal compliance.

Validation

- Readiness and validation views
- Data gaps made visible

Lifecycle

- DPP versions and workflows
- Approvals and audit history

Passport generation

- Passport workspace and views
- QR-linked access

PLATFORM

Command Center: four working views

Product catalog

- Product records, categories, status

Product record

- Identity, linked datasets, passport status

Readiness assessment

- DPP and carbon footprint steps
- Next actions

Passport workspace

- Identifier, lifecycle and publication status

PLATFORM

Publish and share: from version to QR code

Publish a version

- Creates a public passport page
- Versions count once per passport

QR code

- Included with each active DPP
- Scans not billed individually

Public verification

- Visitors need no account
- Included in every plan

PLATFORM

Showcase: see the published result

Live public passport

- Cargo 96 Commercial Battery example
- No account required

QR-linked access

- Every published version gets a page and QR code

Command Center views

- Catalog, record, readiness, passport workspace

INTEGRATIONS

Bring the data you already have

1 Connect a source

- SAP S/4HANA, REST or file

2 Import data

- Products, materials, BOMs, suppliers

3 Review readiness

- Inspect the record and find gaps

4 Publish and share

- Public page and QR code

INTEGRATIONS

SAP S/4HANA connector

Connection

- OData APIs
- OAuth 2.0 client credentials
- Incremental sync

Data brought in

- Products and materials
- Bills of material and suppliers

Digital Product Passport

INTEGRATIONS

Generic REST connector

Connection

- HTTP REST source with JSON
- API key, bearer, basic or OAuth 2.0
- Incremental sync

Data brought in

- Products, materials, BOMs, suppliers
- Documents, evidence, carbon footprint

INTEGRATIONS

CSV / Excel connector

Connection

- CSV, XLS or XLSX
- Public HTTPS file URL
- No connector authentication

Data brought in

- Products, materials, BOMs, suppliers
- Documents, evidence, carbon footprint

INTEGRATIONS

31 future connectors, coming soon

Not available today. No delivery dates are implied.

ERP and finance

- Oracle ERP, NetSuite, Workday
- QuickBooks Online

Engineering and PLM

- Teamcenter, Windchill
- Autodesk Fusion, 3DEXPERIENCE

Data spaces and analytics

- Catena-X / EDC, Snowflake
- Databricks, BigQuery

Cloud, CRM and AI

- Kafka, cloud storage, Salesforce
- Jira, AI Prompt Processor

Digital Product Passport

SOLUTIONS

One need, three kinds of product

Automotive and mobility

- Complex product structures

Batteries and electronics

- Material detail near the product

Industrial manufacturing

- A repeatable data process

Digital Product Passport

SOLUTIONS

Automotive and mobility

Product master

- Core identity, brand, model, category

BOM and components

- Multi-part bills of materials

Supplier records

- Supplier information linked to the product

SOLUTIONS

Industrial manufacturing

Product records

- One shared workspace

Environmental data

- Carbon footprint linked to each product

Readiness review

- Review workflows across products

Digital Product Passport

SOLUTIONS

Batteries and electronics: Battery Passport

Supports preparation under the EU Battery Regulation. It does not certify compliance.

Product identity

- Details, identifiers, model, batch

Materials and origin

- Weights, recycled content, origin countries

Carbon footprint

- Value, method, system boundary

Evidence and review

- Declarations, certificates, test reports

SOLUTIONS

Battery workflow: one battery, then a repeatable process

1 Collect

- Product, supply-chain data and evidence

2 Review

- Readiness checks and data gaps

3 Publish

- Versioned passport with QR-linked public view

Digital Product Passport

PRICING

Start small, scale with your products

Free pilot
- 90 days, 5 products, 10 DPPs, no credit card

Starter €49/mo
- 10 products, 25 DPPs, 3 users

Professional €179/mo
- Most popular. 100 products, 250 DPPs, 10 users

Business €499/mo
- 500 products, 2,000 DPPs, 30 users

Enterprise from €1,800/mo
- 2,000 products, 5,000 DPPs, 100 users

PRICING

Pricing: frequently asked questions

What counts as a DPP?

- Active records, drafts included
- Archived records and versions do not count

Are QR scans charged?

- Not billed individually in normal use

Plans and tax

- Prices exclude VAT
- 15% off with annual billing

BACKGROUND

DPP guide: the regulatory background

Regulation references only. No EU endorsement is implied.

ESPR

- EU Regulation 2024/1781

EU Battery Regulation

- Regulation (EU) 2023/1542

DPP Space role

- Organizes and reviews data
- No legal advice, no certification

NEXT STEP

Start with one product.

Book a demo, or register a company workspace and begin the free pilot.
